

DKM-453 TELEPHONE LINE REMOTE CONTROLLER

APPLICATIONS

Remote control of :

- heating
- illumination
- pumping
- watering
- electrical equipments
via telephone line.

DESCRIPTION

The DKM-453 is a unit that allows its relay outputs controlled remotely by a standard telephone line, in order to turn on or off the required electrical equipment.

The DKM-453 needs no special communication equipment. The control commands are given by using the keys of a DTMF telephone set (or mobile phone). The unit has 3 output relays, and is able to control 3 independent electrical equipments. If needed, more units can be connected in parallel to the same telephone line, in order to obtain extra outputs.

The unit has a 4-digit password in order to eliminate unauthorized access. The control sequence may be started by entering the password.

SPECIFICATIONS

Rings periods before answer:

programmable between 1-8 rings.

Password: 4 digits, modified by the user, (its use is optional, user programmable)

Programming: parameters are programmed via telephone line.

Local control mode: YES, in this case the unit is controlled via the keys positioned on the unit.

Operating temperature: -10 to + 70 °C.

Relative humidity: %10 to %90.

Supply voltage range: 176 to 277 V-AC

Power consumption: 3W max

Dimensions: 96 x 48 x100 mm .(WxHxD).

Mounting hole dimensions: 92 x 44 mm minimum.

Weight: 400g (approx.)
